PATENT COOPERATION TREATY

From the INTERNATIONAL PRELIMINARY EXAMINING AUTHORITY

To: GILLARD, Dr. Richard **ELKINGTON & FIFE** NOTIFICATION OF TRANSMITTAL OF **Prospect House** THE INTERNATIONAL PRELIMINARY RECEIVED 8 Pembroke Road **EXAMINATION REPORT** Sevenoaks, Kent TN13 1XR **GRANDE BRETAGNE** (PCT Rule 71.1) 05 APR 2004 Date of mailing E. & F. SEVEN (day/month/year) 01.04.2004 Applicant's or agent's file reference IMPORTANT NOTIFICATION REG/G19214WO

International application No. PCT/GB 03/02954

International filing date (day/month/year) 08.07.2003

Priority date (day/month/year)

09.07.2002

Applicant

SERICOL LIMITED

- The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

The examination is being carried out on the following application documents:

Text for the Contracting States:

AL AT BE BG CH CY CZ DE DK EE ES FI FR GB GR HU IE IT LI LT LU LV MC MK NL PL PT RO SE SI SK TR

Description, pages:

1-8

as originally filed

Claims, No.:

1-14

as originally filed

Reference is made to the following documents:

D1: WO-A-02061001 **D2**: EP-A-0997508 **D3**: WO-A-0031189

1. Article 33 (2) PCT:

1.1 D1 (= P-document) discloses (see the passages cited in the search report) an ink jet printing ink without solvent comprising multifunctional acrylates, at least one vinyl ether monomer, a radical photoinitiator and at least one coloring agent. D2 discloses (see the passages cited in the search report) an UV-curable ink jet ink without solvent comprising a monomer with acrylate and vinyl ether function in one molecule, a photoinitiator and a coloring agent. D3 discloses (see the passages cited in the search report) a solvent-less ink jet ink comprising multifunctional acrylates, a photoinitiator and a coloring agent.

Thus, the subject matter of claims 1-14 is novel.

2. Article 33 (3) PCT:

D2 tries to solve the same technical problem (provision of UV-curable solvent-free ink jet compositions with low viscosity) and is therefore considered to represent the closest prior art. The difference of D2 compared to the present application is that only one monomer comprising both UV-curable functionalities is used while

WRITTEN OPINION **SEPARATE SHEET**

the application comprises at least 2 monomers (= monofunctional acrylate + bisfunctional vinyl ether). The objective technical problem may therefore be formulated as to provide alternative UV-curable ink jet inks with low viscosity. Since the prior art does not contain hints how to modify the compositions of D2 to arrive at the present application, the subject matter of claims 1-14 is considered to involve an inventive activity.
